Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

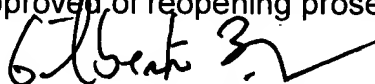

1. In view of the arguments filed on 15 July 2007, PROSECUTION IS HEREBY REOPENED. New grounds of rejection are set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) initiate a new appeal by filing a notice of appeal under 37 CFR 41.31 followed by an appeal brief under 37 CFR 41.37. The previously paid notice of appeal fee and appeal brief fee can be applied to the new appeal. If, however, the appeal fees set forth in 37 CFR 41.20 have been increased since they were previously paid, then appellant must pay the difference between the increased fees and the amount previously paid.

A Supervisory Patent Examiner (SPE) has approved of reopening prosecution by signing below:

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-2 are rejected under 35 U.S.C. 102(e) as being anticipated by Kannan USPN 2001/0054064 A1.

With regard to claims 1 and 11, Kannan discloses a system for securely exchanging information between systems ([0019]) including a requesting system coupled to the Internet from which a user requests assistance from a support representative ([0020]) wherein the user utilizes a Web browser client to request the assistance (520, [0051]), a support representative system coupled to the Internet from which a support representative responds to the requesting user to provide assistance ([0024]) and a collaboration server system coupled to the Internet and accessible to both the requesting system and the support representative system (510, figure 5) for receiving a request from the user for assistance and for processing the request for assistance ([0051]) wherein the collaboration server system includes a rendezvous service (610) responsive to receipt of the request for assistance from the user to initiate communications between the user and the support representative over the Internet between the requesting system and the support representative system ([0082]) in presence of firewall protection in the requesting system and in the support representative system (figure 17), and an interaction service for managing continued interaction between the support representative system and the requesting system in presence of firewall protection in the requesting system and in the support representative system ([0032]).

With regard to claims 2 and 12, Kannan discloses a support representative locator (matcher [0023]).

Art Unit: 2134

With regard to claims 3 and 13, Kannan discloses evaluating rules to match the user to customer service ([0028]).

With regard to claims 4 and 14, Kannan discloses a support proxy for receiving the response to the request ([0127]).

With regard to claims 5 and 15, Kannan discloses the support representative generates the response ([0022]).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 6-10 and 16-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kannan.

With regard to claims 6, 7, 16, and 17, Kannan discloses the system of claim 5, but does not disclose sending a signed module from the support representative to the requestor. The examiner takes official notice that it is well known for support representatives to send modules to customers. It would have been obvious for one of ordinary skill in the art to send an executable in response to a request in Kannan for the motivation of improving support service.

With regard to claims 8-10, and 18-20, the examiner takes further official notice that it is well known to sign and validate software sent over the Internet. It would have been obvious for one of ordinary skill in the art to securely sign and validate software sent from the support of Kannan to the requestor to protect the requestor.

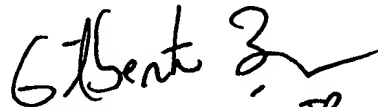

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jacob Lipman whose telephone number is 571-272-3837. The examiner can normally be reached on M-Fr.
